

Guidelines for IDP FINAL REPORT

1. General Formatting Specifications

- i. **Length:** The report shall be no longer than 50 pages (excluding Appendices).
- ii. **Typography:** Use a 12-point Times New Roman font with 1.5 line spacing.

2. Front Matter

- i. **Cover Page:** Must clearly state the Course Information, Project title, Group members, and Instructors.
- ii. **Abstract:** Provide a concise statement of the major results obtained. This section must consist of no more than 1 page. (Note: It is highly recommended that this is prepared last, after the rest of the report has been completed.)
- iii. **Table of Contents**
- iv. **List of Tables**
- v. **List of Figures**
- vi. **List of Abbreviations**

3. Main Body Chapters

- i. **Chapter 1: Introduction**
 - a) **Problem Statement:** Define the core engineering problem.
 - b) **Objectives:** State the measurable goals of the project.
 - c) **Project Significance & Scope:** Detail the importance of the project and its boundaries/limitations.
 - d) **Distribution of Workload:** Clearly outline each group member's specific role and responsibilities.
- ii. **Chapter 2: Literature Review**
 - a) **Background:** Establish the technical context.
 - b) **Commercial/Market Analysis:** Discuss currently available commercial products and provide a thorough market competition and comparison analysis.
- iii. **Chapter 3: Methodology**
 - a) **Project Development:** Comprehensively document your engineering process, including sketching, design, schematics, drawings, simulation setups, experimental setups, and calibration methods.
 - b) **Cost Estimation:** Provide a breakdown of the project budget and expenses.
- iv. **Chapter 4: Results & Discussion**
 - a) **Simulation & Theoretical Analysis:** Present and discuss your theoretical and simulation results.
 - b) **Experimental Results:** Present and critically analyze your physical testing/experimental outcomes.
 - c) **Troubleshooting:** Dedicate sections to identifying potential causes of error and proposing actionable potential solutions.
- v. **Chapter 5: Conclusion**
 - a) Summarize how the prototype met the initial objectives and finalize the report's findings.

4. Back Matter

- i. **References:** All citations and references must strictly adhere to the official UTM thesis format.
- ii. **Appendix:** Include any supplementary materials, lengthy code snippets, or large datasheets here.
